2009 BBS update

1.0 A breeding bird update survey was undertaken on 16 June 2009 at Lindhurst. Refer to **Appendix 6F: 2008 Breeding Bird Survey Report** for methodology and further details.

1.1 The survey conditions were as follows:

Date	Cloud Cover	Rain	Wind	Visibility
16 June 09	66 – 100%	None	Calm	Good

1.2 A total of 36 species were recorded on site, 16 of which are 'notable' either appearing on the BoCC Red or Amber lists, the Notts BoCC list and/or listed as UKBAP Priority Species (refer to Table 1):

Table 1. Summary of the Red and Amber-listed; UKBAP and Notts BoCC species recorded on site in June 2009.

- 1.3 The only 'notable' species recorded on site in 2009 that was not recorded in 2008 was tree sparrow. A pair of birds were recorded in hedgerow near to Firs Farm in the centre of the site.
- 1.4 For those species that were not confirmed as breeding on site, breeding status cannot be reliably predicted during a single survey, and is classed as unknown.
- 1.5 Eighteen Green listed and 2 unlisted (introduced) species were also recorded on site, four of which – blackbird, blue tit, great tit and great-spotted woodpecker – were confirmed as breeding (refer to Table 2 for full survey results).
